

MCC 2022 Draft Resolution

Submitted to: 4th committee

Topic: "The Impact of Climate Change on Conflict Zones"

Alarmed by the current state of climate change

Recognizing the impact of Paris Agreement on future initiatives

Cognizant of past actions on climate change

Determined to change main energy source in order to decrease greenhouse gas emissions

Urging the nations of the UN to create a plan for equal distribution of necessary resources

1. *Suggest* the establishment of the Clean Energy Initiative (CEI), which will:
 1. Initiate the switch from fossil-fuel power to nuclear power
 2. Use the Paris Agreement's financial, technical, and capacity-building support to help sustain nations while they switch from fossil-fuel power to other alternatives, such as:
 1. Wind power
 2. Solar power
 3. Hydropower
 4. Nuclear power
2. *Urges* the subsidization of major car companies globally, which would:
 1. Increase the pace of advancements in electric cars
 2. Decreases the impact of a ban on combustion-powered cars on the economy
3. *Proposes* a plan to be made for each country in case of:
 1. Any natural disasters, mainly ones that could be caused by climate change, such as:
 1. Forest fires
 2. Droughts
 3. Floods
 4. Hurricanes
 5. Storms
 2. Conflict between countries for the sole purpose of gaining more resources that could be lost by climate change
4. *Urges* the establishment of the Global Resources Initiative (GRI), which would:
 1. Increase the transparency between countries for data statistics on the necessary resources
 2. Equally distribute the appropriate number of necessary resources throughout all countries
